ACATS Modification List for ACATS 4.0
Version 4.0K
February 6, 2016

What is this?

This is the ACATS modification list for ACATS 4.0. This document includes test corrections, test
removals, and new tests for ACATS 4.0. ACATS 4.0 is the current test suite for Ada, covering the third

ACATS Modification List version 3.1L for ACATS 3.1 is the current list for that test suite. ACATS 3.1
should be used for testing implementations that support Amendment 1 (ISO/IEC 8652:1995/AMD 1:2007,
often known as "Ada 2005"), and will continue to be maintained as necessary for the foreseeable future.

ACATS Modification List version 2.6D for ACATS 2.6 is the current list for that test suite. ACATS 2.6
should be used for testing implementations of the second edition of Ada, ISO/IEC 8652:1995 (usually
known as "Ada 95"); it also will continue to be maintained as necessary for the foreseeable future.

Changes from the last list:

Note that there is no modification list 4.0I, as I can be confused with 1.

New test C3A0030 checks that access discriminants only exclude null if they include a null exclusion. This
is an inconsistency between Ada 95 and Ada 2005 that does not appear to have been previously tested.

New test C480001 checks that dynamic accessibility checks are made on class-wide allocators.

New test C650B04 checks that accessibility checks are made on the objects returned from a function with a
class-wide return type.

Test B480003 was modified to correct the test objective and test description to actually describe the test;
the objective mentioned qualified expressions (none in uninitialized allocators), and the test description was
unmodified from the older test that had served as a template (thus discussing return statements, not relevant
for a test about allocators). The actual test code is unchanged.

New tests B611001 through B611006 check various rules about preconditions and postconditions.

Test B750A07 was modified to correct the test objective; the objective was unintentionally the same as the
parent test, and never mentioned expression functions.

Test C760015 was modified so that the expected result of Subtest2(4) was correct.

New tests BB42001, BB42002, BB42003, CB42001, CB42002, and CB42003 test a variety of rules about
pragmas Assert and Assertion_Policy.

Many tests changed status on January 1st, this list reflects those changes.

New tests posted between January 1, 2016 and March 31, 2016 will become required for conformity
assessments on October 1, 2016. New tests posted between October 1, 2015 and December 31, 2015 will
become required for conformity assessments on July 1, 2016. New tests posted between July 1, 2015 and
September 30, 2015 will become required for conformity assessments on April 1, 2016. New tests posted
before June 30, 2015 are now required for conformity assessments. All tests posted to modification lists for
other versions of the ACATS are included in ACATS 4.0 if appropriate and thus are required for
conformity assessment using ACATS 4.0 The effective dates of tests are marked in the lists.

Questions about this document? Contact the ACAA Technical Agent at agent@ada-auth.org.

Technical Corrigendum 1:

Beginning with ACATS Modification List 4.0B, we have included tests for corrections (including new
features) in Technical Corrigendum 1, ISO/IEC 8652:2012/Cor 1:2016. All of these changes are corrections
to Ada 2012; as such we will assume all such corrections are implemented in Ada 2012 compilers.

Notice:

The ACAA has created and maintains the Ada Conformity Assessment Test Suite for the purpose of
conformity assessments conducted in accordance with the International Standard ISO/IEC 18009 - Ada:
Conformity assessment of a language processor. This test suite should not be used to make claims of
conformance unless used in accordance with ISO/IEC 18009 and any applicable ACAA procedures.

List explanation:

Test numbers given are for the basic test. Categories are “Withdrawn” (the test should not be processed for
Ada conformity assessments); “Allowed Modification” (either the original test or the modified one should
be processed for Ada conformity assessments); “Modified” (the modified test must be processed for Ada
conformity assessments); “Pending New” (the test does not need to be processed for Ada conformity
assessments, but will be added in the future); “New” (the test is processed for Ada conformity assessments).

ACATS version labels are provided with all new and modified tests. Use this label to retrieve the test from
the ACATS VCS. See “How to get new and modified tests”.

In citations, line numbers are given relative to the start of a test file in the format of '@<line#, line#, ..., >'; if a
test program comprises more than one file, then the particular file will be indicated by "fn", where "n" is the
test-program name's file-designator numeral. E.g., "B38103E : @f1-31, ... " denotes test file
b38103e1.ada. In cases where there are two or more rationales for different errors in a test program, these
different rationales with their respective line citations are listed on separate lines. References to the Ada
standards are given in the format:

<section|chapter>.<clause>[.<subclause>]:<paragraph>

These references are to the Ada standard as available at http://www.adaic.org/resources/add-
contentstandards/12rm/html/RM-TOC.html.

Main list:

===== Core Language =====

Name Category Version label (effective date; old version label) Short description.

C324001 [Modified] VCS Label: A4_0E
Eliminated overlong lines.

C324002 [Modified] VCS Label: A4_0F
[VCS Label A4_0E] Eliminated overlong lines.
[VCS Label A4_0F] Replaced last test case (qualified expressions), as that check is required by the Corrigendum.

C324003 [Pending New] New VCS Label: A4_0H
Required after 2016-04-01
[VCS Label A4_0E] Check that predicates are checked in the correct order and that the specified exception is raised.
[VCS Label A4_0H] Missing function Name is defined.

C324004 [New] VCS Label: A4_0F
Check predicate checks are not performed for static and dynamic subtype predicates when the assertion policy is Ignore, but memberships, the Valid attribute, and for loops continue to use the predicates -- case A: global assertion policy pragmas

C324005 [New] VCS Label: A4_0F
Check predicate checks are not performed for static and dynamic subtype predicates when the assertion policy is Ignore, but memberships, the Valid attribute, and for loops continue to use the predicates -- case B: specific assertion policy pragmas

C390012 [Pending New] New VCS Label: A4_0H
Required after 2016-04-01
Check the operation of Ada.Tags.Generic_Dispatching_Constructor.

C391003 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that a type extension can be declared in a more nested scope than its parent type, and that overridden subprograms of that extension can be dispatched to.
[VCS Label A4_0E] Eliminate an overlong line.

B393011 [New] VCS Label: A4_0D
Check that an abstract routine of an abstract partial view overridden by a non-abstract routine in the private part requires overriding when it is inherited if the private part is not visible where it is inherited.

C3A0030 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that an access discriminant is only null excluding if it includes a null exclusion.

C3A1003 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that a dereference of an access-to-tagged-incomplete type can be passed as a parameter.
[VCS Label A4_0E] Eliminated overlong lines.

C3A1004 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that a parameter of a tagged incomplete type can be passed as a parameter.
[VCS Label A4_0E] Eliminated overlong lines.

B3A1008 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that a dereference of an access-to-incomplete type cannot be used as a prefix.
[VCS Label A4_0E] Eliminated overlong lines.

B3A1009 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that a dereference of an access-to-incomplete view cannot be used as a prefix. Check that a parameter of an incomplete view cannot be used as a prefix.
Check that a dereference of an access-to-formal incomplete type cannot be used as a prefix. Check that a parameter of a tagged formal incomplete type cannot be used as a prefix.

Check that the type of the prefix of 'Access is used to resolve the expected type of the use of the attribute.

Check P 'Access is not allowed in a generic body if P is declared in the generic (including in the parent of a child or in a formal package) and the access type is a formal type or outside of the generic.

Check that the type of the prefix of 'Access is used to resolve the expected type of the use of the attribute.

Check P 'Access is not allowed in a generic body if P is declared in the generic (including in the parent of a child or in a formal package) and the access type is a formal type or outside of the generic.

Check various rules associated with the specification of aspect Implicit_Dereference.

Expression @155-6 violates 6.4.1(6.17/3).

Check that the object denoted by a generalized reference cannot be used as a variable if the discriminant has an access-to-constant type.

Check that a generalized indexing is illegal in a variable context if no Variable_Indexing is specified and Constant_Indexing specifies a function returning an ordinary object.

When both Constant_Indexing and Variable_Indexing are specified, check that a generalized indexing is illegal if it is called in variable contexts when the prefix is a constant and Constant_Indexing specifies a function returning an ordinary object.

Check that the name specified for a Constant_Indexing or Variable_Indexing aspect can refer to a set of overloaded functions, with two or more parameters, and that all of those functions can be used in a generalized indexing.

Check that the overloaded routines can be added to an inherited indexing aspect and the new routines can be used in a generalized indexing.

Correct package C416A02_A to be a child of the foundation.

Remove .K from line @211 so test reflects expected trace.

Check that a component association of others => <> in a record or extension aggregate may have any number of
associated components, including none. (Case 2: Null records and extensions.)

B431005 [New] VCS Label: A4_0B
Check that a component association with an expression in a record or extension aggregate that have more than one associated component is illegal if the expression is illegal for any one of the associated components.

B431006 [New] VCS Label: A4_0C
Check that if a variant part is not nested in an unselected variant, the value of the governing discriminant of a variant in a record aggregate cannot be non-static.

B43102A [Withdrawn] VCS Label: A4_0C
Replaced by B431006.

C433002 [New] VCS Label: A4_0E
[VCS Label A4_0B] Check that no array components can be outside of the index subtype for an array aggregate, even when the components are specified by <>.
[VCS Label A4_0E] Eliminated overlong lines.

B433003 [New] VCS Label: A4_0F
Check that an others choice is not allowed in an array aggregate that is used as the return expression of an expression function or the expression of a return statement if the result subtype of the function is unconstrained.

C433003 [New] VCS Label: A4_0E
[VCS Label A4_0B] Check that for each association with a box in an array aggregate, the component is initialized by default (scalar types with Default Values).
[VCS Label A4_0E] Eliminated overlong lines.

C433004 [New] VCS Label: A4_0E
[VCS Label A4_0B] Check that for each association with a box in an array aggregate, the component is initialized by default (array types with Default Component Values).
[VCS Label A4_0E] Object O6 @136 expects the wrong result. Eliminated overlong lines.

C433005 [New] VCS Label: A4_0E
[VCS Label A4_0B] Check that the constraint of the constrained array subtype of a function return is used to determine the bounds of an array aggregate with an others choice in the expression of a return statement.
[VCS Label A4_0E] Eliminated overlong lines.

C433006 [New] VCS Label: A4_0F
Check that the constraint of the constrained array subtype of a function return is used to determine the bounds of an array aggregate with an others choice in the return expression of an expression function.

B457002 [New] VCS Label: A4_0D
Check that 'others' must be last and alone in a case expression.

B457003 [New] VCS Label: A4_0D
Check that 'else' cannot be omitted for an if expression if the
type of the expression is not a boolean type.

B457004 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that case choice coverage and staticness are enforced for case expressions.
[VCS Label A4_0E] Eliminated overlong lines.

B457005 [New] VCS Label: A4_0D
Check that all or none of the dependent expressions of a conditional expression can be dynamically tagged if the type of the expression is a specific tagged type.

C457005 [Pending New] New VCS Label: A4_0J
Required after 2016-07-01
When the selecting expression of a case expression is a name with a static nominal subtype and has a static predicate, the static predicate is disabled, and the value of the selecting expression does not satisfy the predicate, check that the others choice is returned, or, if there is no others choice, that Constraint_Error is raised.

B457006 [Pending New] New VCS Label: A4_0J
Required after 2016-07-01
Check that an if expression has to be surrounded by parentheses if it is not already surrounded by them.

C457006 [Pending New] New VCS Label: A4_0J
Required after 2016-07-01
Check that overloaded functions can be resolved when they appear as dependent expressions in a conditional expression. Part 1: Enumeration literals.

B457007 [Pending New] New VCS Label: A4_0J
Required after 2016-07-01
Check that if the type of a conditional expression is not determined by the resolution rules, it is illegal.

C457007 [Pending New] New VCS Label: A4_0J
Required after 2016-07-01
Check that literals can be resolved when they appear as dependent expressions in a conditional expression.

C480001 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that an initialized allocator for a class-wide type does an accessibility check on the tag of the initializing object.

B480002 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that an initialized allocator for an access type with a class-wide designated type does not create an object whose type is more local than the access type.
[VCS Label A4_0E] Eliminated overlong lines and tab characters.

B480003 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that an uninitialized allocator for an access type with a class-wide designated type does not create an object whose type is more local than the access type.
[VCS Label A4_0E] Eliminated overlong lines and tab characters.

B480003 [Allowed Modification] New VCS Label: A4_0K Org VCS Label: A4_0E
Required after 2016-07-01
Corrected test objective and test description; the test code is unmodified.

Eliminated overlong lines.

When the selecting expression of a case statement is a name with a static nominal subtype and has a static predicate, the static predicate is disabled, and the value of the selecting expression does not satisfy the predicate, check that the others choice is returned, or, if there is no others choice, that Constraint_Error is raised.

Check that for loops iterate properly over subtypes with static predicates.

Check legality rules for aspect Default_Iterator.

Check legality rules for aspect Iterator_Element.

Check legality rules for array component iterators from Technical Corrigendum 1.

Check correct operation of array component iterators.

Check correct operation of array component iterators where the array has convention Fortran.

Eliminated violations of ACATS lexical rules.

Eliminated violations of ACATS lexical rules.

Check legality rules for container element iterators (most of the checked rules are from Technical Corrigendum 1).

Check legality rules for generalized iterators from Technical Corrigendum 1.

Check that Pre and Post are only allowed on subprograms and entries (and not on subprogram instances).

Check that Pre and Post are not allowed on subprograms acting as completions.
Check that Pre'Class and Post'Class are only allowed on primitive subprograms of tagged types. (Normal tagged types and interfaces.)

Check that Pre'Class and Post'Class are not allowed on subprograms acting as completions.

Check that Pre and Post are not allowed on abstract subprograms and null procedures.

Check that the restrictions on Pre'Class and Post'Class expressions added by AI12-0113-1 are enforced.

Check that abstract nondispatching operations do not participate in resolution.

Eliminate overlong lines and tab characters.

Check that an abstract nondispatching operator provides a way to eliminate an unwanted predefined operator.

Eliminate overlong lines.

Check that the accessibility level of the return subtype indication of an extended return statement cannot be statically deeper that that of the function result if that result is class-wide.

Check that an extended return statement with a constant return object cannot omit the initializing expression.

Check that the result of a function that returns a class-wide tagged type has the tag of the return expression, if the return_subtype_indication (if any) is class-wide. Case A: limited types.

Check that the result of a function that returns a specific tagged type has the tag of the tagged result type, even if the return expression has a different tag.

Check that the result of a function that returns a class-wide tagged type has the tag of the return expression, if the return_subtype_indication (if any) is class-wide. Case B: non-limited types.
Required after 2016-04-01
Check that the result of a function that returns a class-wide tagged type has the tag of the return_subtype_indication if it is a specific tagged type.

C650B04 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that the result of a function that returns a class-wide tagged type does an accessibility check on the tag of the result object when the result expression is class-wide.

B730009 [Modified] VCS Label: A4_0E
Completion of Priv12 @131 Violates 7.3(10.1/3).

B730010 [New] VCS Label: A4_0E
Check 7.3(10.1/3).

B732001 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check various resolution and legality rules for aspect Type_Invariant.
[VCS Label A4_0E] Length @80 should have return type Natural.
Changed Is_Valid to Is_Clean @95, 97, 146 so that the inherited routine doesn't come into play.

C732001 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that assertion checks are made after assignments to and calls with actuals of appropriate view conversions.
[VCS Label A4_0E] Eliminated overlong lines.

C732002 [New] VCS Label: A4_0F
Check some differences between specific and class-wide type invariants.

C732A01 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that the failure of a Type_Invariant check raises Assertion_Error (constrained array).
[VCS Label A4_0E] Eliminated overlong lines.

C732A02 [New] VCS Label: A4_0F
Check that the failure of a Type_Invariant check raises Assertion_Error (part of unconstrained array).

C732B01 [New] VCS Label: A4_0F
Check that the failure of a Type_Invariant check raises Assertion_Error (discriminated record).

C732B02 [New] VCS Label: A4_0F
Check that the failure of a Type_Invariant check raises Assertion_Error (access-to-record).

B732C01 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that the aspect Type_Invariant can only be specified on private types, private extensions, and full types that complete one of the others.
[VCS Label A4_0E] Eliminate overlong lines.

C732C01 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that the failure of a Type_Invariant check raises Assertion_Error (tagged record).
[VCS Label A4_0E] Eliminated overlong lines.
Check that the aspect `Type_Invariant'Class can only be specified on private types, private extensions, and interfaces.

Eliminate overlong lines.

The qualification @129 should be for `Lim_Ext', not `Lim_Rec'.

The qualification @131 should be for `Lim_Ext', not `Lim_Rec'.

Check that only legal expressions are allowed in the qualified expression of an allocator for a limited object.

Check that only legal expressions are allowed in the initialization expression of an extended return statement for a limited object.

Check that only legal expressions are allowed in the expression of a simple return statement for a function that returns a limited type.

Check that only legal expressions are allowed in the return expression of an expression function that returns a limited type.

Corrected objective to mention “expression functions”.

Check that only legal expressions are allowed as the dependent expressions of a conditional expression used as the initialization expression of an object declaration of a limited type.

Check that only legal expressions are allowed as the dependent expressions of a conditional expression used as the default expression of a component declaration of a limited type.

Check that only legal expressions are allowed as the dependent expressions of a conditional expression used as the qualified expression of an initialized allocator for a limited object.

Check that only legal expressions are allowed as the dependent expressions of a conditional expression used as the initializing expression of an extended return statement that returns a limited
type.

B750A12 [Pending New] New VCS Label: A4_0H
Required after 2016-04-01
Check that only legal expressions are allowed as the dependent
expressions of a conditional expression used as the expression of
a simple return statement that returns a limited type.

B750A13 [Pending New] New VCS Label: A4_0H
Required after 2016-04-01
Check that only legal expressions are allowed as the dependent
expressions of a conditional expression used as the return
expression of an expression function that returns a limited type.

C760014 [New] VCS Label: A4_0A
Check that Ada.Finalization is declared pure.

C760015 [New] VCS Label: A4_0E
[VCS Label A4_0D] Check that a controlled type can be declared
within a subprogram.
[VCS Label A4_0E] Eliminate overlong lines.

C760015 [Allowed Modification] New VCS Label: A4_0K Org VCS Label: A4_0E
Required after 2016-07-01
[VCS Label A4_0K] Corrected one of the potential results for
Subtest2(4) to be “Iafcf”, not “IafcF”.

C831001 [New] VCS Label: A4_0F
Check that overriding indicators do not change the dynamic effect
of calls.

B831004 [New] VCS Label: A4_0F
Check that overriding indicators are properly enforced for types
derived from a generic formal type. (Nested generic specification
cases.)

B831005 [New] VCS Label: A4_0F
Check that overriding indicators are properly enforced for types
derived from a generic formal type. (Library unit and body cases.)

B840002 [New] VCS Label: A4_0F
Check a package use clause cannot denote a limited view or a
non-package.

B840003 [New] VCS Label: A4_0F
Check a use all type clause does not make non-primitives or
class-wide operations that aren't directly declare where a
primitive operation would be visible.

B860001 [Pending New] New VCS Label: A4_0J
Required after 2016-07-01
Check that the selecting expression of a case statement or case
expression cannot be resolved if information from the case choices
is needed to resolve it.

BA12017 [New] VCS Label: A4_0E
[VCS Label A4_0C] Check that a limited with clause is not allowed
on a descendant of the named package.
[VCS Label A4_0E] Eliminated overlong line.

BA15003 [New] VCS Label: A4_0C
Check that a library unit pragma must apply to a library unit.

CA21002 [New] VCS Label: A4_0E
Check that Pure and Preelaborate aspects can be specified with an object declared in another package.

CB30001 [New] VCS Label: A4_0B
Check that the optional message parameter is supported in a raise statement, and that the message can be retrieved with Exception_Message.

CB30002 [New] VCS Label: A4_0E
[VCS Label A4_0B] Check that the optional message parameter is supported in a raise expression, and that the message can be retrieved with Exception_Message.
[VCS Label A4_0E] Eliminated overlong lines and tab characters.

BB42001 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that the arguments of a pragma Assert have to have the correct types.

CB42001 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check the usual operation of pragma Assert, including the optional message.

BB42002 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that the arguments of a pragma Assert cannot be reordered even if named notation is used.

CB42002 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that if the assertion policy is Ignore, none of the expressions of a pragma Assert are evaluated and no exception is raised by the pragma.

BB42003 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that a pragma Assertion_Policy is illegal if the policy is not recognized.

CB42003 [Pending New] New VCS Label: A4_0K
Required after 2016-10-01
Check that procedure Ada.Assertions.Assert evaluates its arguments and raises Assertion_Error regardless of the assertion policy.

CC30003 [Modified] VCS Label: A4_0E
Eliminated overlong lines.

CC30004 [Modified] VCS Label: A4_0E
Eliminated overlong lines and tab characters.

CC51010 [New] VCS Label: A4_0D
[VCS Label A4_0D] Check that a generic unit with a tagged incomplete formal type can be instantiated with an incomplete view of a type from a limited withed package, and that operations in the instance can be used normally when the full view of the type is visible.
[VCS Label A4_0E] Added constructor function to generic, as
Elem'Unchecked Access is illegal when Elem is incomplete. Moved body of CC51010_2 so it compiles after another package on which it depends.

BC60001 [New] VCS Label: A4_O
Test rules associated with formal subprogram defaults of null.

CC60001 [New] VCS Label: A4_OG
Check that calls on a formal abstract subprogram are dispatching.

BC60002 [New] VCS Label: A4_OG
Test rules associated with the controlling type of a formal abstract subprogram.

BC60003 [New] VCS Label: A4_OG
Check that the actual subprogram for a formal abstract subprogram must be a dispatching operation of the controlling type.

BC60004 [New] VCS Label: A4_OG
Check that a call on a formal abstract subprogram must be dispatching.

CD30006 [Modified] VCS Label: A4_OE
Eliminated overlong lines and tab characters.

CD30007 [Modified] VCS Label: A4_OE
Eliminated overlong lines.

Required after 2016-07-01
Renaming of previous test CD33001 (there is no subclause 13.3.3). The test is unchanged other than renaming the units involved and fixing an overlong line.

Required after 2016-07-01
Renaming of previous test CD33002 (there is no subclause 13.3.3). The test is unchanged other than renaming the units involved and fixing an overlong line.

CC33001 [Withdrawn] VCS Label: A4_OJ
Renamed to CD30008, as there is no subclause 13.3.3.

CC33002 [Withdrawn] VCS Label: A4_OJ
Renamed to CD30009, as there is no subclause 13.3.3.

Required after 2016-07-01
Check that appropriate entities are visible in an aspect specification.

Required after 2016-07-01
Check that entities in the private part of a package are not visible in aspect specifications given in the visible part.

BDB3A01 [New] VCS Label: A4_OE
[VCS Label A4_OE] Declaration of Pool @53 is missing the TC_Id discriminant.
CDB3A01 [New] VCS Label: A4_0E
   [VCS Label A4_0B] Test that aspect Default_Storage_Pool changes
   the default storage pool for a generic instantiation.
   [VCS Label A4_0E] Eliminated overlong line.

BDD2004 [Modified] VCS Label: A4 0E
   [VCS Label A4_0B] Error @229 is legal by AI12-0121-1.
   [VCS Label A4_0E] Eliminated overlong lines.

BDD2005 [Modified] VCS Label: A4 0E
   [VCS Label A4_0B] Replaced test cases waiting on AI12-0106-1 (now
   approved) and made changes required by AI12-0121-1.
   [VCS Label A4_0E] Eliminated overlong lines.

CXA4037 [New] VCS Label: A4_0F
   Check Ada.Strings.Fixed.Find_Token against rule from 2001
   Corrigendum.

CXA5016 [New] VCS Label: A4_0E
   [VCS Label A4_0C] Check operation of attribute Machine_Rounding.
   [VCS Label A4_0E] Eliminated overlong lines.

CXAA021 [New] VCS Label: A4_0C
   Check file operations of Text_IO.Bounded_IO.

CXAA022 [New] VCS Label: A4_0C
   Check file operations of Text_IO.Unbounded_IO.

CXAB002 [New] VCS Label: A4_0C
   Check file operations of Wide_Text_IO.Wide_Bounded_IO.

CXAB003 [New] VCS Label: A4_0C
   Check file operations of Wide_Wide_Text_IO.Wide_Wide_Bounded_IO.

CXAB004 [New] VCS Label: A4_0C
   Check file operations of Wide_Text_IO.Wide_Unbounded_IO.

CXAB005 [New] VCS Label: A4_0C
   Check file operations of Wide_Wide_Text_IO.Wide_Wide_Unbounded_IO.

CXAC008 [Pending New] New VCS Label: A4_0H
   Required after 2016-04-01
   [VCS Label A4_0C] Check that Stream_IO files opened with mode
   Out File are not truncated by Close or Reset.
   [VCS Label A4_0D] Corrected required file size in subtest 8, and
   various failure messages.
   [VCS Label A4_0E] Eliminated overlong lines.
   [VCS Label A4_0H] Corrected a failure message.

CXAG001 [New] VCS Label: A4_0E
   Check that Ada.Directories can be used to create and delete
   directories.

CXAG002 [New] VCS Label: A4_0E
   Check that Ada.Directories.Hierarchical_File_Names exists and
   works as expected.

CXAH001 [New] VCS Label: A4_0E
   [VCS Label A4_0D] Test that package Environment_Variables can be
   used to read environment variables.
[VCS Label A4_0E] Added missing Applicability Criteria.

CXAH002 [New] VCS Label: A4_0E
[VCS Label A4_0D] Test that package Environment_Variables can be used to modify environment variables.
[VCS Label A4_0E] Added missing Applicability Criteria.

CXAH003 [New] VCS Label: A4_0E
[VCS Label A4_0D] Test the two parameter Value in package Environment_Variables.
[VCS Label A4_0E] Added missing Applicability Criteria.

BXAI001 [New] VCS Label: A4_0B
Test that package Hashed_Maps does not allow reverse iterators.

BXAI002 [New] VCS Label: A4_0B
Test that package Hashed_Sets does not allow reverse iterators.

BXAI003 [New] VCS Label: A4_0B
Test that package Bounded_Hashed_Maps does not allow reverse iterators.

BXAI004 [New] VCS Label: A4_0B
Test that package Bounded_Hashed_Sets does not allow reverse iterators.

BXAI005 [New] VCS Label: A4_0E
[VCS Label A4_0B] Test that package Hashed_Sets does not allow direct writing of set elements.
[VCS Label A4_0E] Eliminated overlong lines.

BXAI006 [New] VCS Label: A4_0E
[VCS Label A4_0B] Test that package Ordered_Sets does not allow direct writing of set elements.
[VCS Label A4_0E] Eliminated overlong lines.

BXAI007 [New] VCS Label: A4_0E
[VCS Label A4_0B] Test that package Bounded_Hashed_Sets does not allow direct writing of set elements.
[VCS Label A4_0E] Eliminated overlong lines.

BXAI008 [New] VCS Label: A4_0E
[VCS Label A4_0B] Test that package Bounded_Ordered_Sets does not allow direct writing of set elements.
[VCS Label A4_0E] Eliminated overlong lines.

BXAIA01 [New] VCS Label: A4_0B
Test that package Indefinite_Hashed_Maps does not allow reverse iterators.

BXAIA02 [New] VCS Label: A4_0B
Test that package Indefinite_Hashed_Set does not allow reverse iterators.

BXAIA03 [New] VCS Label: A4_0E
[VCS Label A4_0B] Test that package Indefinite_Hashed_Sets does not allow direct writing of set elements.
[VCS Label A4_0E] Eliminated overlong lines.

BXAIA04 [New] VCS Label: A4_0E
[VCS Label A4_0B] Test that package Indefinite_Ordered_Sets does
not allow direct writing of set elements.
[VCS Label A4_0E] Eliminated overlong lines.

CXAI027 [Modified] VCS Label: A4_0B
Corrected the name of the package that is reported as being tested.

BXB3001 [New] VCS Label: A4_OF
Check B.3.3(8/2).

BXB3002 [New] VCS Label: A4_OF
Check B.3.3(9/3).

BXB3003 [New] VCS Label: A4_OF
Check B.3.3(11/2).

BXB3004 [New] VCS Label: A4_OF
Check that rules for the application of aspect Unchecked_Union are enforced.

CXB3019 [New] VCS Label: A4_OF
Check B.3.3(23/2).

CXB3020 [New] VCS Label: A4_OF
Check B.3.3(24/2).

CXB3021 [New] VCS Label: A4_OF
Check B.3.3(25/2).

CXB3022 [New] VCS Label: A4_OF
Check B.3.3(26/2).

Required after 2016-07-01
Check that a value of an unchecked union type (defined with pragma Unchecked_Union) can be passed to a C function.

Required after 2016-07-01
Check that a value of an unchecked union type (defined with aspect Unchecked_Union) can be passed to a C function.

===== Support =====

F416A00 [New] VCS Label: A4_0F
Foundation for tests B416A01, C416A01, and C416A02.

F552A00 [Modified] VCS Label: A4_0H
The Constant_Reference routine @237 and @388 needs to return a Bingo_Call value rather than a reference, (and then was renamed) in order to prevent an accessibility failure.

F650B00 [Pending New] New VCS Label: A4_0H
Required after 2016-04-01
Foundation for tests C650B01, C650B02, and C650B03.

F732A00 [New] VCS Label: A4_0F
[VCS Label A4_0D] Foundation for test C732A01.
[VCS Label A4_0E] Eliminated overlong lines.
[VCS Label A4_0F] Added types and operations to support test C732A02. They are only needed for that test.

F732B00 [New] VCS Label: A4_0F
Foundation for tests C732B01 and C732B02.

F732C00 [New] VCS Label: A4_0E
[VCS Label A4_0D] Foundation for tests B732C01, B732C02, and C732C01.
[VCS Label A4_0E] Eliminated overlong lines.

FDB3A00 [New] VCS Label: A4_0E
[VCS Label A4_0B] Foundation for test BDB3A01 and CDB3A01.
[VCS Label A4_0E] Eliminated overlong line.

IMPDEF [Modified] VCS Label: A4_0E
[VCS Label A4_0D] Added constants for the names of environment variables used by tests CXAH001, CXAH002, and CXAH003. Also removed obsolete .AW file constants (these are not used as test source has been provided in UTF-8 format since the release of ACATS 3.0). The change is only needed for those tests, it has no effect on any other tests.
[VCS Label A4_0E] Added a constant and function used by tests CXAG001 and CXAG002. The change is only needed for those tests, it has no effect on any other tests.

Required after 2016-04-01
[VCS Label A4_0J] Added constants for the external names for the imported routines in tests CXB3023 and CXB3024. The change is only needed for those tests, it has no effect on any other test.

---

How to get new and modified tests:
The official home of the ACATS test suite is the ACAA web site. The site can be accessed at www.ada-auth.org.

The complete set of official new and modified tests are available in the Mod_4_0K.Zip and Tar files on the ACAA web site.

Individual new and modified tests can be retrieved from the ACATS VCS. Simply navigate to the appropriate directory (folder), and select the test you want. Select the revision you want (usually the most recent) and it will be retrieved for you. Tests are stored in directories that correspond to the test’s prefix. For instance, the test CD92001.A will be found in the CD directory. You can also browse the differences between versions of a test. [In case of a conflict, the files in the ACATS VCS should be considered the 'official' versions.]

If you cannot get the files from the official site or you cannot get the files in a format appropriate for your processor, please contact your ACAL.

The baseline ACATS 4.0 is available in various formats on the ACAA web site.
