ACATS Modification List for ACATS 4.1
Version 4.1K
December 20, 2018

What is this?

This is the ACATS modification list for ACATS 4.1. This document includes test corrections, test removals, and new tests for ACATS 4.1. ACATS 4.1 is the current test suite for Ada, covering the third edition of Ada, ISO/IEC 8652:2012 (usually known as "Ada 2012").

ACATS Modification List version 3.1U for ACATS 3.1 is the current list for that test suite. ACATS 3.1 should be used for testing implementations that support Amendment 1 (ISO/IEC 8652:1995/AMD 1:2007, often known as "Ada 2005"), and will continue to be maintained as necessary for the foreseeable future.

ACATS Modification List version 2.6G for ACATS 2.6 is the current list for that test suite. ACATS 2.6 should be used for testing implementations of the second edition of Ada, ISO/IEC 8652:1995 (usually known as "Ada 95"); it also will continue to be maintained as necessary for the foreseeable future.

Changes from the last list:

A handful of tests changed status on October 1st; see the lists for the details.

New test B452001 checks that memberships against objects require a visible equality operation.

New test C452003 checks that memberships of general access-to-object types work as defined when applied to anonymous access-to-tagged types.

New tests C452A01, C452A02, and C452A03 check that language-defined types properly implement equality.

Test B851007 was corrected to fix incorrect types and parameter modes. This changes the effective date for this test.

New test B831006 checks that giving overriding indicators on operations declared in a protected body are always illegal.

New tests posted between October 1, 2018 and December 31, 2018 will become required for conformity assessments on July 1, 2019. New tests posted between July 1, 2018 and September 30, 2018 will become required for conformity assessments on April 1, 2019. New tests posted between April 1, 2018 and June 30, 2018 will become required for conformity assessments on January 1, 2019. New tests posted before April 1, 2018 are required for conformity assessments. The effective dates of tests are marked in the lists.

Questions about this document? Contact the ACAA Technical Agent at agent@ada-auth.org.

ACATS 4.1 includes optional Test Grading tools

ACATS 4.1 introduces new test grading tools.

When the ACATS was designed (as the ACVC in the early 1980s), the intention always was that running it would give a simple and clear Pass or Fail result. However, grading of tests (particularly of B and L Tests) is somewhat subjective and very time-consuming. (Test grading typically involved poring over compiler listings of the entire ACATS with a large highlighter.) The subjectivity was acceptable in the days of common formal testing, as the formal testers would enforce a common grading standard (even if no one could describe what that was), but in an age of self-testing, it reduces the value of the ACATS.
As such, we're introducing a long-overdue set of automated grading tools. These tools are intended to:

- Greatly reduce the effort to grade an ACATS test run (and, hopefully to reduce the cost of formal testing to make it a more practical option);
- Ensure that all users of the ACATS grade tests in the same way, thus making it more valid to compare ACATS results between different implementations and different testers;
- Give implementers certainty as to whether a particular test result is passing (whether the location of an error is “close enough” to the canonical position);
- Be able to detect process errors (especially errors of omission) – that is, tests improperly run (for instance, files compiled in the wrong order where the ACATS requires an order), or not run at all (if one is checking off lines in a listing, it's hard to notice that some test or portion of a test is missing).

The tools will also optionally give feedback to implementers about quality of error message positioning and of error cascades (does one error generate multiple messages?). (Since “goodness of an implementation” is not something that the ACATS tests for, this is not an official goal for the tools.)

This is an ambitious set of goals. It's unlikely that they'll be completely met by the initial versions of the tools. As such, their use will be completely optional (but encouraged!) for ACATS 4.1. The tools will be updated periodically by the normal process for updating the ACATS – an ACATS Modification List like this one.

Details on the operation of the tools can be found in the ACATS 4.1 documentation (that documentation can be found at http://www.ada-auth.org/acats-files/4.1/docs/UG-6.HTM). As always, if you have questions, contact the ACAA Technical Agent at agent@ada-auth.org.

Notice:

The ACAA has created and maintains the Ada Conformity Assessment Test Suite for the purpose of conformity assessments conducted in accordance with the International Standard ISO/IEC 18009 - Ada: Conformity assessment of a language processor. This test suite should not be used to make claims of conformance unless used in accordance with ISO/IEC 18009 and any applicable ACAA procedures.

List explanation:

Test numbers given are for the basic test. Categories are “Withdrawn” (the test should not be processed for Ada conformity assessments); “Allowed Modification” (either the original test or the modified one should be processed for Ada conformity assessments); “Modified” (the modified test must be processed for Ada conformity assessments); “Pending New” (the test does not need to be processed for Ada conformity assessments, but will be added in the future); “New” (the test is processed for Ada conformity assessments).

ACATS version labels are provided with all new and modified tests. Use this label to retrieve the test from the ACATS VCS. See “How to get new and modified tests”.

In citations, line numbers are given relative to the start of a test file in the format of '@<line#,...>'; if a test program comprises more than one file, then the particular file will be indicated by "fn", where "n" is the test-program name's file-designator numeral. E.g., "B38103E : @f1-31,... " denotes test file b38103e1.ada. In cases where there are two or more rationales for different errors in a test program, these different rationales with their respective line citations are listed on separate lines. References to the Ada standards are given in the format:

<section|chapter> [.<clause> [.<subclause> ]]:<paragraph>

These references are to the consolidated Ada standard as available at http://www.ada-auth.org/standards/rm12_w_te1/html/RM-TOC.html.

</table>
B392005 [Modified] VCS Label: A4_1G
Revised to use Possible Error tags, and added error location indicators.

B393001 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B393007 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies. Fixed overlong lines.

B393010 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies. Fixed overlong lines.

C3A0030 [New] VCS Label: A4_1A
Check that an access discriminant is only null excluding if it includes a null exclusion.

B3A1001 [Modified] VCS Label: A4_1A
Split Pack6 so possible error sets don't intersect; fixed overlong lines.

B3A1002 [Modified] VCS Label: A4_1A
Split Pack6 so possible error sets don't intersect; fixed overlong lines.

B3A2007 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2008 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2009 [Modified] VCS Label: A4_1G
Removed tabs to meet test format standards; added error location indicators.

B3A2011 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2012 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2016 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2018 [Pending New] New VCS Label: A4_1H
Required after 2019-01-01
Check that an explicitly aliased parameter has the same accessibility level as a normal parameter unless compared to the return object. Check that master of the function call is properly
determined statically.

B413004 [Allowed Modification] New VCS Label: A4_1J Org VCS Label: A3_1
Required after 2019-01-01
PPA and PFA trigger the issue of AI12-0289-1; explicit null exclusions were added to the parameters to avoid it.

B452001 [Pending New] New VCS Label: A4_1K
Required after 2019-07-01
Check that a membership that contains choice expressions is illegal for a limited type that does not have equality.

C452002 [New] VCS Label: A4_1F
[VCS Label A4_1D] Check that overloading resolution of Ada 2012 membership operations works as intended.
[VCS Label A4_1F] Fixed incorrect test number passed to Report.

C452003 [Pending New] New VCS Label: A4_1K
Required after 2019-07-01
Check that memberships of general access-to-object types work as defined.

C452A01 [Pending New] New VCS Label: A4_1K
Required after 2019-07-01
Check that "=" for language-defined private types behaves as if it is predefined. Part 1: core types.

C452A02 [Pending New] New VCS Label: A4_1K
Required after 2019-07-01
Check that "=" for language-defined private types behaves as if it is predefined. Part 2: types of the Ada.Strings subsystem.

C452A03 [Pending New] New VCS Label: A4_1K
Required after 2019-07-01
Check that "=" for language-defined private types behaves as if it is predefined. Part 3: Annex C types.

C453001 [New] VCS Label: A4_1D
Check that modular adding operators wrap around rather than raising Constraint_Error.

B455002 [Modified] VCS Label: A4_1A
Corrected casing of error tags and fixed overlong lines.

B457001 [Modified] VCS Label: A4_1F
Fixed overlong lines. Added location indicators.

B457004 [Modified] VCS Label: A4_1F
There should not be an ERROR tag @282; Single_Highest @290 should be Single_High. Added location indicators.

B458001 [New] VCS Label: A4_1F
Check that a quantified expression has to be surrounded in parentheses if it is not already surrounded by them.

C460014 [New] VCS Label: A4_1C
Check that Constraint_Error is raised appropriately when
converting access-to-classwide to another access type.

C460015 [New] VCS Label: A4_1C
Check that Constraint_Error is raised appropriately when converting access-to-limited-classwide to another access type.

B470001 [New] VCS Label: A4_1D
Check that qualified expressions are a constant view of the expression, even if the expression is a variable object.

C470001 [New] VCS Label: A4_1D
Check that qualified expressions are a name, and thus can be used as a prefix and other places a name is required.

C480001 [New] VCS Label: A4_1D
[VCS Label A4_1A] Check that an initialized allocator for a class-wide type does an accessibility check on the tag of the initializing object.
[VCS Label A4_1D] Changed mode to "in" (instead of "in out") @103 & 144 as those parameters are used in functions, making that an Ada 2012 feature, and this is an Ada 2005 test.

B480004 [New] VCS Label: A4_1G
Check that an allocator is illegal if the access type has a Storage_Size that is statically zero.

B4A010C [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

C52101A [Modified] VCS Label: A4_1A
Corrected comment @49 not to have the form of an error tag.

B540001 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B540002 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B01B [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B01C [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B02B [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B02C [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.
Added additional error locations to directly support common error reporting strategies.

Check that Pre and Post are only allowed on subprograms and entries (and not on subprogram instances).

Check that Pre'Class and Post'Class are only allowed on primitive subprograms of tagged types. (Normal tagged types and interfaces.)

Check that Pre and Post are not allowed on abstract subprograms and null procedures.

Check that the restrictions on Pre'Class and Post'Class expressions added by AI12-0113-1 are enforced.

Check that the inherited Proc4 routine is abstract and thus is not subject to the new rule.

Check that Pre'Class and Post'Class are not allowed on subprograms acting as completions.

Corrected several error location codes.

Clarified error @208; changed error @233 & @247 to OK (as the inherited Proc4 routine is abstract and thus is not subject to the new rule).
Check that Pre'Class and Post'Class are not allowed on entries and protected subprograms of untagged task and protected types.

Corrected preconditions @77 and @110 not to violate the new rule added by Binding Interpretation AI12-0166-1.

Check various rules about the use of the Result attribute.

Check that F'Result is not allowed in the body of F.

Check that the Old attribute is not allowed in a subprogram or entry body, or in an accept statement.

Check that the prefix of an Old attribute cannot be used within a precondition expression nor in a generic specification outside of a postcondition expression.

Check that the prefix of an Old attribute cannot contain the Result attribute, another Old attribute, nor the index of a quantified expression.

For a discrete X, check that X'Old has the nominal subtype of X.

Check that the prefix of an Old attribute cannot have a limited type.

Check that tagged task and tagged protected types do not allow Pre'Class and Post'Class, nor are they allowed on operations of those types.

Check that Pre'Class cannot be specified for an overriding of a subprogram that does not specify Pre'Class.

Declaration of New_Proc @358 is not overriding and thus not subject to the rule. The declaration of Shine @149 never overrides primitives of the actual type by 12.3(18), thus this rule does not apply to instances of Gen2. Added an example using a generic derived type.

Check 6.1.1(10-16/3).

Type T08 @230 and @241 needs to be declared abstract.
The declaration of Get_Count never overrides primitives of the actual type by 12.3(18), thus this rule does not apply to instances of Gen2. Added examples using generic derived types.

Check that preconditions and postconditions where both specific and class-wide contracts apply are checked properly.

Check that the correct expressions are evaluated for specific preconditions and postconditions, and that they are evaluated at the correct point. The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

Check that the correct expressions are evaluated for class-wide preconditions and postconditions, and that they are evaluated at the correct point. The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

Check that the correct expressions are evaluated for class-wide preconditions and postconditions of an interface type, and that they are evaluated at the correct point. Fixed overlong lines.

Check that X'Old has the tag of X and not the tag of the nominal subtype of X (for Post). The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

Check that X'Old has the tag of X and not the tag of the nominal subtype of X (for Post'Class). The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

Check that X'Old has the tag of X and not the tag of the nominal subtype of X (for Post'Class of an interface type). Fixed overlong lines.

Changed error @35 to be optional, as the syntax error @33 is required (and the comment that only one error need be detected is bogus).

Changed error @41 to be optional, as the syntax error @33 is required.
required (and the comment that only one error need be detected is bogus).

B65005A [Modified] VCS Label: A4_1D
Added additional error locations to directly support common error reporting strategies.

B65005B [Modified] VCS Label: A4_1D
Added additional error locations to directly support common error reporting strategies.

C650B04 [New] VCS Label: A4_1A
Check that the result of a function that returns a class-wide tagged type does an accessibility check on the tag of the result object when the result expression is class-wide.

B651001 [New] VCS Label: A4_1D
Check that a return statement cannot apply to a nonreturning procedure, and that a renames-as-body of a nonreturning procedure has to be a nonreturning procedure (pragma No_Return version).

C651001 [New] VCS Label: A4_1D
Check that a nonreturning procedure can raise an exception and raises Program_Error otherwise (pragma No_Return version).

B651002 [New] VCS Label: A4_1D
Check that a return statement cannot apply to a nonreturning procedure, and that a renames-as-body of a nonreturning procedure has to be a nonreturning procedure (aspect No_Return version).

C651002 [New] VCS Label: A4_1D
Check that a nonreturning procedure can raise an exception and raises Program_Error otherwise (aspect No_Return version).

B651003 [New] VCS Label: A4_1D
Check that an aspect No_Return can only be given on a procedure or generic procedure, that the expression has to be nonstatic, and that the aspect is not given on an instance or null procedure.

B680001 [Modified] VCS Label: A4_1F
The immediately enclosing expression function @140 does not declare a parameter A, but A is used @141. Added location indicators.

B730006 [Modified] VCS Label: A4_1C
Corrected format of error tags; added location indicators.

B730011 [New] VCS Label: A4_1C
Test various rules about completions of private types and extensions; replaces test B74001A.

B730012 [New] VCS Label: A4_1C
Test various rules about completions of private types and extensions in generic units; replaces test B74001B.

B730013 [New] VCS Label: A4_1D
Test operations available for a private type; replaces test
B740003E.

B73001A [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B73001B [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B73001C [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B73001D [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B73001E [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B73001F [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B73001G [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B73001H [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B740003 [Modified] VCS Label: A4_1H
[VCS Label A4_1A] Modified criteria @75 so that it doesn't look like an error tag to the grading tools; also fixed an overlong line.
[VCS Label A4_1H] Modified grading to document that processing the main is optional. Added error location indicators.

B74001A [Withdrawn] VCS Label: A4_1C
Replaced by B730011.

B74001B [Withdrawn] VCS Label: A4_1C
Replaced by B730012.

B74203E [Withdrawn] VCS Label: A4_1D
Replaced by B730013.

B750A07 [New] VCS Label: A4_1G
[VCS Label A4_1A] Check that only legal expressions are allowed in the return expression of an expression function that returns a limited type.
[VCS Label A1_1G] Adjusted error indicators to allow the error to be reported anywhere in a multi-line expression.
Checks that functions that return immutably limited types are built-in-place.

Checks that expression functions that return immutably limited types are built-in-place.

The discriminant 890 needs a default expression as all or none of the discriminants of a type need defaults. Also added error location indicators.

Corrected bad error tag, and added error location indicators.

Required after 2019-07-01

Checks that overriding indicators cannot be given on any subprogram declaration in a protected body.

Removed possible error cascades, reformatted some error tags, and added error location indicators.

Updated many optional error markers to match ACATS standards.

Replaced by B851005.

Replaced by B851007.

Replaced by B851007.

Revised test to eliminate cases whose result would be changed by pending AI12-0287-1, and added cases to preserve complete testing.

Checks that “known to be constrained” is properly enforced for renames. Part 1: “Normal” cases (no generics or access cases).

Checks that “known to be constrained” is properly enforced for renames. Part 2: Access cases.

Checks that “known to be constrained” is properly enforced for renames. Part 3: Generic cases.
[VCS Label A4_1K] Corrected types of declaration @198 and @214, and mode @328.

B853001 [Pending New] New VCS Label: A4_1H
   Required after 2019-01-01
   Checks that a renamed limited view cannot be used where there is not a with for the original package.

B854002 [Pending New] New VCS Label: A4_1J
   Required after 2019-04-01
   [VCS Label A4_1H] When parameter or result has a null exclusion for a subprogram rename, check that the subtype of the corresponding parameter or result of the renamed subprogram must exclude null.
   [VCS Label A4_1J] Corrected wording of the second test objective.

B854003 [Pending New] New VCS Label: A4_1J
   Required after 2019-04-01
   Check various rules about renames as body: conformance of both the renaming and renamed entity, and renaming of abstract and intrinsic subprograms.

B854004 [Pending New] New VCS Label: A4_1J
   Required after 2019-04-01
   Check that renaming a subprogram that requires overriding is illegal.

B854005 [Pending New] New VCS Label: A4_1J
   Required after 2019-04-01
   Check that a renaming of a prefixed view is illegal if renaming the prefix as an object is illegal.

B91003A [Modified] VCS Label: A4_1C
   Added additional error locations to directly support common error reporting strategies.

B91003B [Modified] VCS Label: A4_1C
   Added additional error locations to directly support common error reporting strategies.

B91003C [Modified] VCS Label: A4_1C
   Added additional error locations to directly support common error reporting strategies.

B91003D [Modified] VCS Label: A4_1C
   Added additional error locations to directly support common error reporting strategies.

B940003 [Modified] VCS Label: A4_1C
   Added additional error locations to directly support common error reporting strategies.

B940004 [Modified] VCS Label: A4_1C
   Split into 8 files; added location indicators.

B95007B [Modified] VCS Label: A4_1A
   Fixed error markers @62,66,70 to match ACATS standards.
BA1001D [Modified] VCS Label: A4_1G
Revised to mark the main subprogram as optional, as it is not necessary to check the test objective. Added error location indicators.

BA1020F [Modified] VCS Label: A4_1G
Revised to mark the main subprogram as optional, as it is not necessary to check the test objective. Added error location indicators.

BA11007 [Modified] VCS Label: A4_1G
Split into six test files to avoid requiring error recovery.

BA11013 [Modified] VCS Label: A4_1G
Revised to make processing the last compilation unit optional, as it is not necessary to check the test objective. Added error location indicators.

BA1101E [Withdrawn] Org VCS Label: A4_1G
Replaced by test BA14001.

BA12010 [Modified] VCS Label: A4_1G
Revised to use Possible Error tags, and added error location indicators.

BA12018 [Pending New] New VCS Label: A4_1H
Required after 2019-01-01
Check that names mentioned but not named in a private with are also treated as privately withed.

BA14001 [New] VCS Label: A4_1G
Replaces test BA1101E with modern format and additional test cases for Ada 95 compilation units.

BA14002 [New] VCS Label: A4_1G
Similar to BA14001, testing private with.

BA14003 [New] VCS Label: A4_1G
Checks that a unit is illegal if it depends on two versions of the same unit.

BA21005 [New] VCS Label: A4_1D
Test that Pure and Preelaborate aspects cannot be specified late, with a nonstatic expression, or an expression of a type other than Boolean.

BB42001 [New] VCS Label: A4_1C
[VCS Label A4_1A] Check that the arguments of a pragma Assert have to have the correct types.
[VCS Label A4_1C] Corrected two incorrect error location codes.

CB42001 [New] VCS Label: A4_1A
Check the usual operation of pragma Assert, including the optional message.

BB42002 [New] New VCS Label: A4_1A
Check that the arguments of a pragma Assert cannot be reordered even if named notation is used.

Check that the assertion policy is Ignore, none of the expressions of a pragma Assert are evaluated and no exception is raised by the pragma.

Check that procedure Ada.Assertions.Assert evaluates its arguments and raises Assertion_Error regardless of the assertion policy.

Moved “=” for type Rec in order that it not violate 4.5.2(9.8/4).

Moved test to eliminate cases whose result would be changed by pending AI12-0287-1, and to preserve complete testing.

The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

Corrected bad error tag, and added error location indicators.

Checks that the null exclusion of the formal type and of the actual subtype for a generic formal access type must match.

Corrected wording of the second test objective.

Has one of the objectives of, and thus redundant with, test CD2A31C (now CD30012).

Has one of the objectives of, and thus redundant with, test CD2A21C (now CD30011).

Virtually identical to, and thus redundant with, test CD2D13A.
CD1009M [Withdrawn] VCS Label: A4_1D
Virtually identical to, and thus redundant with, test CD3014C.

CD11001 [New] VCS Label: A4_1A
Check that appropriate entities are visible in an aspect specification.

CD2A21C [Withdrawn] VCS Label: A4_1D
Replaced by CD30011.

CD2A31C [Withdrawn] VCS Label: A4_1D
Replaced by CD30012.

BD30001 [New] VCS Label: A4_1D
Check Legality Rules are enforced when Size is specified by an aspect specification for a type.

BD30002 [New] VCS Label: A4_1D
Check Legality Rules are enforced when Alignment is specified by an aspect specification for a type.

BD30003 [New] VCS Label: A4_1D
Check Legality Rules are enforced when Component_Size is specified by an aspect specification.

CD30010 [New] VCS Label: A4_1D
Check that Component_Size can be specified via an aspect specification.

CD30011 [New] VCS Label: A4_1D
Merges legacy tests CD1009B and CD2A21C to eliminate duplication (CD1009B has the same objective as one of the objectives of CD2A21C) while adding modern formatting and applicability criteria.

CD30012 [New] VCS Label: A4_1D
Merges legacy tests CD1009A and CD2A31C to eliminate duplication (CD1009A has the same objective as one of the objectives of CD2A31C) while adding modern formatting and applicability criteria.

BD4003A [Modified] VCS Label: A4_1A
Moved error marker from @66 to @67 so it is on the incorrect construct.

BDB0A01 [Modified] VCS Label: A4_1G
Revised to use Possible Error tags, and added error location indicators.

BDB2001 [New] VCS Label: A4_1G
Check that a call on an instance of Unchecked_Degallocation is illegal if the access type has a Storage_Size that is statically zero.

BDD2003 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.
CDE0002 [Modified] VCS Label: A4_1E
   Changed to use Storage_Size rather than Size so that the static expression rule of 13.14(7.2/3) is not triggered.

CXAC009 [New] VCS Label: A4_1D
   Check that Stream_IO.File_Type has Preelaborable_Initialization.

CXAG003 [Pending New] New VCS Label: A4_1H
   Required after 2019-01-01
   [VCS Label A4_1G] Check that function Ada.Directories.Name_Case_Equivalence exists and that it reflects the handling of file names.
   [VCS Label A4_1H] Added “return;” @171; if the file can't be opened, the Read_File trial is complete.

CXB3023 [New] VCS Label: A4_1A
   Check that a value of an unchecked union type (defined with pragma Unchecked_Union) can be passed to a C function.

CXB3024 [New] VCS Label: A4_1A
   Check that a value of an unchecked union type (defined with aspect Unchecked_Union) can be passed to a C function.

===== Annex C =====
BXC6A03 [Modified] VCS Label: A4_1G
   Changed subtest result to require the changes of AI05-0218-1.

===== Annex D =====
CXD2007 [Modified] VCS Label: A4_1C
   Added missing N/A => Error tag.
LXD7001 [Modified] VCS Label: A4_1C
   Added missing error tag.
LXD7003 [Modified] VCS Label: A4_1C
   Added missing error tag.
LXD7004 [Modified] VCS Label: A4_1C
   Added missing error tag.
LXD7005 [Modified] VCS Label: A4_1C
   Added missing error tag.
LXD7006 [Modified] VCS Label: A4_1C
   Added missing error tag.
LXD7007 [Modified] VCS Label: A4_1C
   Added missing error tag.
LXD7008 [Modified] VCS Label: A4_1C
   Added missing error tag.
LXD7009 [Modified] VCS Label: A4_1C
Added location indicators.

CXDB001 [Modified] VCS Label: A4_1C
Added missing N/A => Error tag.

CXDB002 [Modified] VCS Label: A4_1C
Added missing N/A => Error tag.

CXDB003 [Modified] VCS Label: A4_1C
Added missing N/A => Error tag.

CXDB004 [Modified] VCS Label: A4_1C
Added missing N/A => Error tag.

===== Annex E =====
[None.]

===== Annex F =====
[None.]

===== Annex G =====
[None.]

===== Annex H =====
LXH4001 [Modified] VCS Label: A4_1C
Corrected format of error tag; added location indicators.

LXH4003 [Modified] VCS Label: A4_1C
Corrected format of error tag; added location indicators.

LXH4006 [Modified] VCS Label: A4_1C
Added missing error tags.

LXH4009 [Modified] VCS Label: A4_1C
Added missing error tags.

LXH4013 [Modified] VCS Label: A4_1C
Added missing error tags.

LXH4014 [Modified] VCS Label: A4_1C
Added missing error tags.

===== Support =====
F611A00 [New] VCS Label: A4_1A
[VCS Label A4_1A] Foundation for tests C611A01, C611A02, and C611A03.
[VCS Label A4_1C] Added additional data for test C611A04. The changes are only needed for that test.

F611B00 [New] VCS Label: A4_1A
Foundation for tests C611B01, C611B02, and C611B03.
GRADE.A [Modified] VCS Label: A4_1G
[VCS Label A4_1C] Allowed manual grading for tests that are
missing execution or linking (with no earlier errors). Corrected
the result for binder crashes. Added category totals to the
summary.
[VCS Label A4_1D] Corrected so that Annex C RQMT failures are
properly counted in their own category.
[VCS Label A4_1G] Corrected call @1578 so that the special
handling flag rather than the failed flag is used with a manual
grading message for a missing error set. (The actual grade was
correct, only the message was wrong.)

GRD_DATA.A [Modified] VCS Label: A4_1D
Increased table sizes as the new tests have caused grading the
entire ACATS to exceed the old limits.

SPECIAL.A [Modified] VCS Label: A4_1H
[VCS Label A4_1C] Added test BA21005 to the list of optional main
subprograms.
[VCS Label A4_1H] Added seven tests to the list of optional main
subprograms.

SPECIAL.A [Allowed Modification] New VCS Label: A4_1J Org VCS Label:
A4_1H
Required after 2019-01-01
Added more tests to the list of optional main subprograms.

SUMMARY.A [Modified] VCS Label: A4_1C
Corrected identification of main subprograms in modern tests.
Changed the unit name for subunits to be the full expanded name
including the parent name.

TCTOUCH.ADA [Modified] VCS Label: A4_1H
Added code so that Touch only reports buffer overflow once. Fixed
the Id string.

How to get new and modified tests:

The official home of the ACATS test suite is the ACAA web site. The site can be accessed at www.ada-auth.org.

The complete set of official new and modified tests are available in the Mod_4_1K.Zip and Tar files on the
ACAA web site. As always, when a multi-file test is modified, we provide all of the files, including the
unmodified files.

Individual new and modified tests can be retrieved from the ACATS VCS. Simply navigate to the
appropriate directory (folder), and select the test you want. Select the revision you want (usually the most
recent) and it will be retrieved for you. Tests are stored in directories that correspond to the test’s prefix.
For instance, the test CD92001.A will be found in the CD directory. You can also browse the differences
between versions of a test. [In case of a conflict, the files in the ACATS VCS should be considered the
‘official’ versions.]

If you cannot get the files from the official site or you cannot get the files in a format appropriate for your
processor, please contact your ACAL.
The baseline ACATS 4.1 is available in various formats on the ACAA web site.
