ACATS Modification List for ACATS 4.1
Version 4.1U
December 31, 2020

What is this?

This is the ACATS modification list for ACATS 4.1. This document includes test corrections, test removals, and new tests for ACATS 4.1. ACATS 4.1 is the current test suite for Ada, covering the third edition of Ada, ISO/IEC 8652:2012 (usually known as "Ada 2012").

ACATS Modification List version 3.1BB for ACATS 3.1 is the current list for that test suite. ACATS 3.1 should be used for testing implementations that support Amendment 1 (ISO/IEC 8652:1995/AMD 1:2007, often known as "Ada 2005"), and will continue to be maintained as necessary for the foreseeable future.

ACATS Modification List version 2.6H for ACATS 2.6 is the current list for that test suite. ACATS 2.6 should be used for testing implementations of the second edition of Ada, ISO/IEC 8652:1995 (usually known as "Ada 95"); it also will continue to be maintained as necessary for the foreseeable future.

Changes from the last list:

Tests CXAIB01, CXAIB02, CXAIB03, and CXAIB04 had an error corrected – some of the Insert calls had a parameter with the wrong instance prefixing No_Element.

Note: Some Allowed Modification tests have a required date of “ACATS 4.2”. These are tests that don't have substantive changes, but rather change comments (including error locations for B-Tests). For ACATS users that are using traditional results comparison rather than the ACATS grading tools, changing these tests may cause work without benefit (since the tests don't have significant changes). As such, we're allowing the use of the old versions of the tests until the time when the next ACATS version (ACATS 4.2) is issued (not likely before winter 2021; it will be announced at least 90 days in advance of issuance).

New tests posted between October 1, 2020 and December 31, 2020 will become required for conformity assessments on July 1, 2021. New tests posted between July 1, 2020 and September 30, 2020 will become required for conformity assessments on April 1, 2021. New tests posted between April 1, 2020 and June 30, 2020 will become required for conformity assessments on January 1, 2021. New tests posted before April 1, 2020 are required for conformity assessments. The effective dates of tests are marked in the lists.

Questions about this document? Contact the ACAA Technical Agent at agent@ada-auth.org.

ACATS 4.1 includes optional Test Grading tools

ACATS 4.1 introduces new test grading tools.

When the ACATS was designed (as the ACVC in the early 1980s), the intention always was that running it would give a simple and clear Pass or Fail result. However, grading of tests (particularly of B and L Tests) is somewhat subjective and very time-consuming. (Test grading typically involved poring over compiler listings of the entire ACATS with a large highlighter.) The subjectivity was acceptable in the days of common formal testing, as the formal testers would enforce a common grading standard (even if no one could describe what that was), but in an age of self-testing, it reduces the value of the ACATS.

As such, we're introducing a long-overdue set of automated grading tools. These tools are intended to:

• Greatly reduce the effort to grade an ACATS test run (and, hopefully to reduce the cost of formal testing to make it a more practical option);
• Ensure that all users of the ACATS grade tests in the same way, thus making it more valid to compare ACATS results between different implementations and different testers;
Give implementers certainty as to whether a particular test result is passing (whether the location of an error is “close enough” to the canonical position);

Be able to detect process errors (especially errors of omission) – that is, tests improperly run (for instance, files compiled in the wrong order where the ACATS requires an order), or not run at all (if one is checking off lines in a listing, it's hard to notice that some test or portion of a test is missing).

The tools also will optionally give feedback to implementers about quality of error message positioning and of error cascades (does one error generate multiple messages?). (Since “goodness of an implementation” is not something that the ACATS tests for, this is not an official goal for the tools.)

This is an ambitious set of goals. It's unlikely that they'll be completely met by the initial versions of the tools. As such, their use will be completely optional (but encouraged!) for ACATS 4.1. The tools will be updated periodically by the normal process for updating the ACATS – an ACATS Modification List like this one.

Details on the operation of the tools can be found in the ACATS 4.1 documentation (that documentation can be found at http://www.ada-auth.org/acats-files/4.1/docs/UG-6.HTM). As always, if you have questions, contact the ACAA Technical Agent at agent@ada-auth.org.

Notice:

The ACAA has created and maintains the Ada Conformity Assessment Test Suite for the purpose of conformity assessments conducted in accordance with the International Standard ISO/IEC 18009 - Ada: Conformity assessment of a language processor. This test suite should not be used to make claims of conformance unless used in accordance with ISO/IEC 18009 and any applicable ACAA procedures.

List explanation:

Test numbers given are for the basic test. Categories are “Withdrawn” (the test should not be processed for Ada conformity assessments); “Allowed Modification” (either the original test or the modified one should be processed for Ada conformity assessments); “Modified” (the modified test must be processed for Ada conformity assessments); “Pending New” (the test does not need to be processed for Ada conformity assessments, but will be added in the future); “New” (the test is processed for Ada conformity assessments).

ACATS version labels are provided with all new and modified tests. Use this label to retrieve the test from the ACATS VCS. See “How to get new and modified tests”.

In citations, line numbers are given relative to the start of a test file in the format of '@<line#,line#,...,>'; if a test program comprises more than one file, then the particular file will be indicated by "fn", where "n" is the test-program name's file-designator numeral. E.g., "B38103E : @f1-31, " denotes test file b38103e1.ada. In cases where there are two or more rationales for different errors in a test program, these different rationales with their respective line citations are listed on separate lines. References to the Ada standards are given in the format:

<section|chapter>.<clause>[.<subclause>]:<paragraph>

These references are to the consolidated Ada standard as available at http://www.ada-auth.org/standards/rm12_w_tc1/html/RM-TOC.html.

Main list:

====== Core Language ======
Name     Category  Version label  (effective date; old version label)  
Short description.

Required in ACATS 4.2
Added error location indicators.

B33001A [Modified] VCS Label: A4_1P  
Added error location indicators, added additional possible error 
locations, restored likely intended test for Set2.

Required in ACATS 4.2
Added error location indicators.

B350001 [New] VCS Label: A4_1Q  
Check that the requirements on the specification of the 
Default_Value aspect are enforced.

C350001 [New] VCS Label: A4_1D  
Check that the object form of the Image attribute is implemented.

C350A01 [Pending New] VCS Label: A4_1R  
Required after 2021-01-01
Check that objects of types with specified Default_Values are 

C350A02 [Pending New] VCS Label: A4_1R  
Required after 2021-01-01
Check that objects of types with specified Default_Values are 
properly initialized. Part 2: Generic discrete types.

C350B01 [Pending New] VCS Label: A4_1R  
Required after 2021-01-01
Check that objects of types with specified Default_Values are 
properly initialized. Part 3: Normal real types.

C350B02 [Pending New] VCS Label: A4_1R  
Required after 2021-01-01
Check that objects of types with specified Default_Values are 
properly initialized. Part 4: Generic real types.

C352001 [Modified] VCS Label: A4_1D  
Corrected Failed message @267 to reflect intended result.

B354002 [New] VCS Label: A4_1D  
Test basic requirements for the Mod attribute.

C354004 [New] VCS Label: A4_1D  
Test basic operation of the Mod attribute.

B35A001 [New] VCS Label: A4_1D  
Check Legality Rules are enforced when Small is specified by an 
aspect specification.

C35A001 [New] VCS Label: A4_1D
Check that Small can be specified by an aspect specification.

B360001 [New] VCS Label: A4_1Q
Check that the requirements on the specification of the Default_Component_Value aspect are enforced.

C360A01 [Pending New] VCS Label: A4_1S
Required after 2021-04-01
Check that objects of types with specified Default_Component_Values are properly initialized. Part 1: Arrays of discrete types.

C360A02 [Pending New] VCS Label: A4_1S
Required after 2021-04-01
Check that objects of types with specified Default_Component_Values are properly initialized. Part 2: Generic arrays of discrete types.

C360B01 [Pending New] VCS Label: A4_1S
Required after 2021-04-01
Check that objects of types with specified Default_Component_Values are properly initialized. Part 3: Arrays of real types.

C360B02 [Pending New] VCS Label: A4_1S
Required after 2021-04-01
Check that objects of types with specified Default_Component_Values are properly initialized. Part 4: Generic arrays of real types.

B37309B [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B37310B [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B37311A [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B38003D [Modified] VCS Label: A4_1A
Corrected error tags @70,76,82,88 so “optional” and “error” are on the same line, as required by the test standards.

Required in ACATS 4.2
Added error location indicators.

B38103B [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

B38103C [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.
B38103D [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

B38103E [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

B392002 [Modified] VCS Label: A4_1G
Revised to use Possible Error tags, and added error location indicators.

B392003 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B392004 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B392005 [Modified] VCS Label: A4_1G
Revised to use Possible Error tags, and added error location indicators.

B393001 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B393007 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies. Fixed overlong lines.

B393010 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies. Fixed overlong lines.

B393012 [Pending New] New VCS Label: A4_1P
Required after 2020-07-01
Check that abstract types cannot be used in additional contexts that do not allow abstract types.

B393013 [Pending New] New VCS Label: A4_1P
Required after 2020-07-01
Check that interface types cannot be used in additional contexts that do not allow abstract types.

C3A0030 [New] VCS Label: A4_1A
Check that an access discriminant is only null excluding if it includes a null exclusion.

B3A1001 [Modified] VCS Label: A4_1A
Split Pack6 so possible error sets don't intersect; fixed overlong lines.

B3A1002 [Modified] VCS Label: A4_1A
Split Pack6 so possible error sets don't intersect; fixed
overlong lines.

B3A2007 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2008 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2009 [Modified] VCS Label: A4_1G
Removed tabs to meet test format standards; added error location indicators.

B3A2011 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2012 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2016 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B3A2018 [New] VCS Label: A4_1H
Check that an explicitly aliased parameter has the same accessibility level as a normal parameter unless compared to the return object. Check that master of the function call is properly determined statically.

B3A2018 [Allowed Modification] New VCS Label: A4_1T Org VCS Label: A4_1H
Required after 2021-04-01
Corrected so that it is not affected by whether AI12-0345-1, AI12-0402-1, and AI12-0390-1 are implemented.

B413004 [Modified] VCS Label: A4_1J
PPA and PFA trigger the issue of AI12-0289-1; explicit null exclusions were added to the parameters to avoid it.

C415001 [Modified] VCS Label: A4_1P
[VCS Label A4_1N] Return $119 fails an accessibility check unless C is aliased.
[VCS Label A4_1P] The subtype of My_Colln $125 needs to be either discriminated or to statically match that of the formal types of the parameters.

B431007 [Pending New] New VCS Label: A4_1P
Required after 2020-07-01
Check that record aggregates are not allowed for types whose components aren't visible.

B432002 [Pending New] New VCS Label: A4_1P
Required after 2020-07-01
Check that all of the extensions of an extension aggregate are record extensions.
B432003 [Pending New] New VCS Label: A4_1P
Required after 2020-07-01
Check that the ancestor subtype_mark of an extension aggregate
does not denote a view with unknown discriminants.

B452001 [New] VCS Label: A4_1K
Check that a membership that contains choice expressions is
illegal for a limited type that does not have equality.

B452002 [New] VCS Label: A4_1L
Check that Resolution and Legality Rules for the universal access
equality operator are enforced.

C452002 [New] VCS Label: A4_1F
[VCS Label A4_1D] Check that overloading resolution of Ada 2012
membership operations works as intended.
[VCS Label A4_1F] Fixed incorrect test number passed to Report.

C452003 [New] VCS Label: A4_1R
[VCS Label A4_1K] Check that memberships of general access-to-
object types work as defined.

C452004 [New] VCS Label: A4_1Q
[VCS Label A4_1L] Check that memberships with multiple choices are
evaluated as Required, and that the correct equality operation is
called for untagged record types.
[VCS Label A4_1Q] LTemp and RTemp @ 136 and 164 should be declared
Integer rather than Natural, as the numerators are of type Integer
and can be negative.

C452005 [New] VCS Label: A4_1L
Check that memberships with multiple choices call the correct
equality operation for array types.

C452006 [New] VCS Label: A4_1M
[VCS Label A4_1L] Check that memberships with multiple choices
call the correct equality operation for access types.
[VCS Label A4_1M] Corrected to remove cases made illegal by
AI12-0328-1.

C452A01 [New] VCS Label: A4_1K
Check that “=” for language-defined private types behaves as if it
is predefined. Part 1: core types.

C452A02 [New] VCS Label: A4_1K
Check that “=” for language-defined private types behaves as if it
is predefined. Part 2: types of the Ada.Strings subsystem.

C452A03 [New] VCS Label: A4_1K
Check that “=” for language-defined private types behaves as if it
is predefined. Part 3: Annex C types.

C453001 [New] VCS Label: A4_1D
Check that modular adding operators wrap around rather than
raising Constraint_Error.
Corrected casing of error tags and fixed overlong lines.

There should not be an ERROR tag @282; Single_Highest @290 should be Single_High. Added location indicators.

Check that a quantified expression has to be surrounded in parentheses if it is not already surrounded by them.

Check that Constraint_Error is raised appropriately when converting access-to-classwide to another access type.

Check that Constraint_Error is raised appropriately when converting access-to-limited-classwide to another access type.

Check that qualified expressions are a constant view of the expression, even if the expression is a variable object.

Check that qualified expressions are a name, and thus can be used as a prefix and other places a name is required.

Check that an initialized allocator for a class-wide type does an accessibility check on the tag of the initializing object.

Changed mode to “in” (instead of “in out”) @103 & 144 as those parameters are used in functions, making that an Ada 2012 feature, and this is an Ada 2005 test.

Check that an allocator is illegal if the access type has a Storage Size that is statically zero.

Added error location indicators.

Added error location indicators.

Added error location indicators.

Added error location indicators.
Added error location indicators.

B490003 [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Moved error tags to more usual locations, added error location indicators.

B4A010C [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

C52101A [Modified] VCS Label: A4_1A
Corrected comment @49 not to have the form of an error tag.

B540001 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B540002 [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B01B [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B01C [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B02B [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B02C [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B02D [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B04A [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B04B [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B54B05A [Modified] VCS Label: A4_1G
Added additional error locations to directly support common error reporting strategies.

B551002 [Modified] VCS Label: A4_1N
Revised test to remove dependence on Ada.Iterator_Interfaces.
Added additional error locations to directly support common error reporting strategies. Fixed an overlong line.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Added error location indicators.

Added error location indicators.

Check that Pre and Post are only allowed on subprograms and entries (and not on subprogram instances).

Check that Pre and Post are not allowed on subprograms acting as completions.

Corrected several error location codes.

Check that Pre'Class and Post'Class are only allowed on primitive subprograms of tagged types. (Normal tagged types and interfaces.)

Check that Pre'Class and Post'Class are not allowed on subprograms acting as completions.

Check that Pre and Post are not allowed on abstract subprograms and null procedures.

Check that the restrictions on Pre'Class and Post'Class expressions added by AI12-0113-1 are enforced.

Clarified error @208; changed error @233 & @247 to OK (as the inherited Proc4 routine is abstract and thus is not subject to the new rule).

Check that Pre'Class and Post'Class are not allowed on entries and protected subprograms of untagged task and protected types.

Corrected preconditions @77 and @110 not to violate the new rule added by Binding Interpretation AI12-0166-1.

Check various rules about the use of the Result attribute.
Check that F'Result is not allowed in the body of F.

Check that the Old attribute is not allowed in a subprogram or entry body, or in an accept statement.

Check the Old attribute cannot be used within a precondition expression nor in a generic specification outside of a postcondition expression.

Check that the prefix of an Old attribute cannot contain the Result attribute, another Old attribute, nor the index of a quantified expression.

For a discrete X, check that X'Old has the nominal subtype of X.

If an Old attribute reference occurs at a place where it is potentially unevaluated, check that the prefix must statically denote an object.

Corrected error location codes @240 and @252.

Check that the prefix of an Old attribute cannot have a limited type.

Check that tagged task and tagged protected types do not allow Pre'Class and Post'Class, nor are they allowed on operations of those types.

Check that Pre'Class cannot be specified for an overriding of a subprogram that does not specify Pre'Class.

Declaration of NewProc @358 is not overriding and thus not subject to the rule. The declaration of Shine @149 never overrides primitives of the actual type by 12.3(18), thus this rule does not apply to instances of Gen2. Added an example using a generic derived type.

Check 6.1.1(10-16/3).

Type T08 @230 and @241 needs to be declared abstract.

Check 6.1.1(17/3).

The declaration of Get_Count @112 never overrides primitives of the actual type by 12.3(18), thus this rule does not apply to instances of Gen2. Added examples using generic derived types.
Check that preconditions and postconditions where both specific and class-wide contracts apply are checked properly.

[VCS Label A4_1C] Check that the correct expressions are evaluated for specific preconditions and postconditions, and that they are evaluated at the correct point.
[VCS Label A4_1C] The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

[VCS Label A4_1C] Check that class-wide preconditions and postconditions are evaluated correctly, and that they are evaluated at the correct point.
[VCS Label A4_1C] The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

[VCS Label A4_1D] Check that class-wide preconditions and postconditions of an interface type are evaluated correctly, and that they are evaluated at the correct point.
[VCS Label A4_1D] Fixed overlong lines.

[VCS Label A4_1C] Check that X'Old has the tag of X and not the tag of the nominal subtype of X (for Post).
[VCS Label A4_1C] The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

[VCS Label A4_1C] Check that X'Old has the tag of X and not the tag of the nominal subtype of X (for Post'Class).
[VCS Label A4_1C] The main subprogram name was corrected to follow the rules of the ACATS User's Guide, clause 4.3.3.

[VCS Label A4_1D] Check that X'Old has the tag of X and not the tag of the nominal subtype of X (for Post'Class of an interface type).
[VCS Label A4_1D] Fixed overlong lines.

Modernizes, adds test cases to, and eliminates illegal calls from legacy test C95072A.

Changed error @35 to be optional, as the syntax error @33 is required (and the comment that only one error need be detected is bogus).

Changed error @41 to be optional, as the syntax error @33 is required (and the comment that only one error need be detected is bogus).
Check that a prefixed view is intrinsic.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Check that the result of a function that returns a class-wide tagged type does an accessibility check on the tag of the result object when the result expression is class-wide.

Check that a return statement cannot apply to a nonreturning procedure, and that a renames-as-body of a nonreturning procedure has to be a nonreturning procedure (pragma No_Return version).

Corrected pragmas @176 and @179 to refer to the immediately preceding procedures.

Check that a nonreturning procedure can raise an exception and raises Program_Error otherwise (pragma No_Return version).

Check that a return statement cannot apply to a nonreturning procedure, and that a renames-as-body of a nonreturning procedure has to be a nonreturning procedure (aspect No_Return version).

Check that a nonreturning procedure can raise an exception and raises Program_Error otherwise (aspect No_Return version).

Check that an aspect No_Return can only be given on a procedure or generic procedure, that the expression has to be nonstatic, and that the aspect is not given on an instance or null procedure.

Added error location indicators.

Fixed overlong lines, added error location indicators.

Added error location indicators.
Added error location indicators.

The immediately enclosing expression function $140$ does not declare a parameter $A$, but $A$ is used $141$. Added location indicators.

Corrected format of error tags; added location indicators.

Test various rules about completions of private types and extensions; replaces test B74001A.

Test various rules about completions of private types and extensions in generic units; replaces test B74001B.

Test operations available for a private type; replaces test B74203E.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.

Added additional error locations to directly support common error reporting strategies.
[VCS Label A4_1A] Modified criteria @75 so that it doesn't look like an error tag to the grading tools; also fixed an overlong line.
[VCS Label A4_1H] Modified grading to document that processing the main is optional. Added error location indicators.

B74001A [Withdrawn] VCS Label: A4_1C
   Replaced by B730011.

B74001B [Withdrawn] VCS Label: A4_1C
   Replaced by B730012.

B74203E [Withdrawn] VCS Label: A4_1D
   Replaced by B730013.

B750A07 [New] VCS Label: A4_1G
   [VCS Label A4_1A] Check that only legal expressions are allowed in the return expression of an expression function that returns a limited type.
   [VCS Label A4_1G] Adjusted error indicators to allow the error to be reported anywhere in a multi-line expression.

C760A02 [New] VCS Label: A4_1G
   Checks that functions that return immutably limited types are built-in-place.

C760A03 [New] VCS Label: A4_1G
   Checks that expression functions that return immutably limited types are built-in-place.

B83027B [Modified] VCS Label: A4_1G
   The discriminant @90 needs a default expression as all or none of the discriminants of a type need defaults. Also added error location indicators.

B83027D [Modified] VCS Label: A4_1G
   Corrected bad error tag, and added error location indicators.

B831006 [New] VCS Label: A4_1K
   Checks that overriding indicators cannot be given on any subprogram declaration in a protected body.

B83E01B [Modified] VCS Label: A4_1G
   Removed possible error cascades, reformatted some error tags, and added error location indicators.

B83F02C [Modified] VCS Label: A4_1A
   Updated many optional error markers to match ACATS standards.

B85002A [Withdrawn] VCS Label: A4_1H
   Replaced by B851005.

B85003A [Withdrawn] VCS Label: A4_1H
   Replaced by B851007.

B85003B [Withdrawn] VCS Label: A4_1H
   Replaced by B851007.
Revised test to eliminate cases whose result would be changed by pending AI12-0287-1, and added cases to preserve complete testing.

Checks that “known to be constrained” is properly enforced for renames. Part 1: “Normal” cases (no generics or access cases).

Checks that “known to be constrained” is properly enforced for renames. Part 2: Access cases.

Checks that “known to be constrained” is properly enforced for renames. Part 3: Generic cases.

Corrected types of declaration @198 and @214, and mode @328.

Checks that a renamed limited view cannot be used where there is not a with for the original package.

When parameter or result has a null exclusion for a subprogram rename, check that the subtype of the corresponding parameter or result of the renamed subprogram must exclude null.

Corrected wording of the second test objective. Corrected error markers on RenG51, RenG61, RenGF51, and RenGF61. Corrected renaming @412 to rename the correct function.

Check various rules about renames as body: conformance of both the renaming and renamed entity, and renaming of abstract and intrinsic subprograms.

Check that renaming a subprogram that requires overriding is illegal.

Check that a renaming of a prefixed view is illegal if renaming the prefix as an object is illegal.

Check that implicit conversions of access types don't allow too much.

Added additional error locations to directly support common error reporting strategies.
reporting strategies.

B91003C [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B91003D [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B940003 [Modified] VCS Label: A4_1C
Added additional error locations to directly support common error reporting strategies.

B940004 [Modified] VCS Label: A4_1C
Split into 8 files; added location indicators.

B940008 [New] VCS Label: A4_1M
Check the overriding indicators work properly on protected subprograms.

B940009 [New] VCS Label: A4_1M
Check that the mode and type of the first parameter of protected operations that implement inherited subprograms is correct.

B940010 [New] VCS Label: A4_1M
Check that a protected operation and a primitive subprogram of a tagged protected type cannot have the same profile.

B940011 [New] VCS Label: A4_1M
Check that a protected operation and the associated inherited operation must subtype conform. Check that inherited operations must be implemented, overridden, or be a null procedure.

C940017 [New] VCS Label: A4_1M
Check that dispatching calls can be made through a protected interface and that they can be implemented with protected subprograms and entries.

C94001A [Modified] VCS Label: A4_1M
Revised test to replace excessive delays with Impdef constants.

C94001B [Modified] VCS Label: A4_1M
Revised test to replace excessive delays with Impdef constants.

C94001C [Modified] VCS Label: A4_1M
Revised test to replace excessive delays with Impdef constants.

C94002A [Modified] VCS Label: A4_1M
Revised test to replace excessive delays with Impdef constants.

C94004A [Modified] VCS Label: A4_1M
Revised test to replace excessive delays with Impdef constants.

C94004B [Modified] VCS Label: A4_1M
Revised test to replace excessive delays with Impdef constants.
Revised test to replace excessive delays with Impdef constants.

Revised test to replace excessive delays with Impdef constants.

Revised test to replace excessive delays with Impdef constants.

Revised test to replace excessive delays with Impdef constants.

Revised test to replace excessive delays with Impdef constants.

B95007B [Modified] VCS Label: A4_1A
Fixed error markers @62,66,70 to match ACATS standards.

Revised test to replace excessive delays with Impdef constants.

Revised to mark the main subprogram as optional, as it is not necessary to check the test objective. Added error location indicators.

Revised to mark the main subprogram as optional, as it is not necessary to check the test objective. Added error location indicators.

Split into six test files to avoid requiring error recovery.

Revised to make processing the last compilation unit optional, as it is not necessary to check the test objective. Added error location indicators.

Replaced by test BA14001.

Revised to use Possible Error tags, and added error location indicators.
Check that names mentioned but not named in a private with are also treated as privately withed.

Replaces test BA1101E with modern format and additional test cases for Ada 95 compilation units.

Similar to BA14001, testing private with.

Checks that a unit is illegal if it depends on two versions of the same unit.

Test that Pure and Preelaborate aspects cannot be specified late, with a nonstatic expression, or an expression of a type other than Boolean.

Check that the arguments of a pragma Assert have to have the correct types.

Corrected two incorrect error location codes.

Check the usual operation of pragma Assert, including the optional message.

Check that the arguments of a pragma Assert cannot be reordered even if named notation is used.

Check that if the assertion policy is Ignore, none of the expressions of a pragma Assert are evaluated and no exception is raised by the pragma.

Check that a pragma Assertion_Policy is illegal if the policy is not recognized.

Check that procedure Ada.Assertions.Assert evaluates its arguments and raises Assertion_Error regardless of the assertion policy.

Moved “=” for type Rec in order that it not violate 4.5.2(9.8/4).

Checks that the subtype of the actual for a generic formal object with a null exclusion must exclude null.

Revised test to eliminate cases whose result would be changed by pending AI12-0287-1, and to preserve complete testing.

The main subprogram name was corrected to follow the rules of the
ACATS User's Guide, clause 4.3.3.

BC51016 [Modified] VCS Label: A4_1G
Corrected bad error tag, and added error location indicators.

BC51019 [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

BC51020 [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

BC51B02 [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

BC51C01 [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

BC51C02 [Allowed Modification] New VCS Label: A4_1P Org VCS Label: A4_1
Required in ACATS 4.2
Added error location indicators.

BC54004 [New] VCS Label: A4_1H
Checks that the null exclusion of the formal type and of the actual subtype for a generic formal access type must match.

BC55001 [Pending New] New VCS Label: A4_1P
Required after 2020-07-01
Check that formal interface types cannot be used in contexts that do not allow abstract types.

BC60005 [New] VCS Label: A4_1J
[VCS Label A4_1H] Checks that the subtype of a parameter or result of the actual subprogram for a generic formal subprogram where the corresponding parameter or result has a null exclusion must exclude null.
[VCS Label A4_1J] Corrected wording of the second test objective.
[VCS Label A4_1R] Corrected instance @437 to use correct actual parameter.

BD10001 [Pending New] VCS Label: A4_1R
Required after 2021-01-01
Check that an aspect cannot be specified in multiple ways for a single entity.

CD1009A [Withdrawn] VCS Label: A4_1D
Has one of the objectives of, and thus redundant with, test CD2A31C (now CD30012).

CD1009B [Withdrawn] VCS Label: A4_1D
Has one of the objectives of, and thus redundant with, test CD2A21C (now CD30011).
CD1009L [Withdrawn] VCS Label: A4_1D
  Virtually identical to, and thus redundant with, test CD2D13A.

CD1009M [Withdrawn] VCS Label: A4_1D
  Virtually identical to, and thus redundant with, test CD3014C.

CD11001 [New] VCS Label: A4_1A
  Check that appropriate entities are visible in an aspect specification.

CD2A21C [Withdrawn] VCS Label: A4_1D
  Replaced by CD30011.

CD2A31C [Withdrawn] VCS Label: A4_1D
  Replaced by CD30012.

BD30001 [New] VCS Label: A4_1D
  Check Legality Rules are enforced when Size is specified by an aspect specification for a type.

BD30002 [New] VCS Label: A4_1D
  Check Legality Rules are enforced when Alignment is specified by an aspect specification for a type.

BD30003 [New] VCS Label: A4_1D
  Check Legality Rules are enforced when Component_Size is specified by an aspect specification.

CD30010 [New] VCS Label: A4_1D
  Check that Component_Size can be specified via an aspect specification.

CD30011 [New] VCS Label: A4_1D
  Merges legacy tests CD1009B and CD2A21C to eliminate duplication (CD1009B has the same objective as one of the objectives of CD2A21C) while adding modern formatting and applicability criteria.

CD30012 [New] VCS Label: A4_1D
  Merges legacy tests CD1009A and CD2A31C to eliminate duplication (CD1009A has the same objective as one of the objectives of CD2A31C) while adding modern formatting and applicability criteria.

BD4003A [Modified] VCS Label: A4_1A
  Moved error marker from @66 to @67 so it is on the incorrect construct.

BDB0A01 [Modified] VCS Label: A4_1G
  Revised to use Possible Error tags, and added error location indicators.

BDB2001 [New] VCS Label: A4_1G
  Check that a call on an instance of Unchecked_Deallocation is illegal if the access type has a Storage_Size that is statically zero.
Check that the object for a pool that supports subpools is declared in the same scope as the access type that uses it.

Added additional error locations to directly support common error reporting strategies.

Check that the requirements for specifying the Stream_Size attribute are enforced.

Check that the requirements for specifying the Stream_Size aspect are enforced.

Check that confirming Stream_Size attributes work as expected.

Check that confirming Stream_Size aspects work as expected.

Check that non-confirming Stream_Size attributes work as expected.

Check that non-confirming Stream_Size aspects work as expected.

Changed to use Storage_Size rather than Size so that the static expression rule of 13.14(7.2/3) is not triggered.

Check that Stream_IO.File_Type has Preelaborable_Initialization.

Check that function Ada.Directories.Name_Case_Equivalence exists and that it reflects the handling of file names.

Added "$return;" @171; if the file can't be opened, the Read_File trial is complete.

Check that Ada.Containers.Vectors is preelaborated, and it and types declared in it can be used in preelaborated packages.

Corrected instance prefix of No_Element in some Insert calls. Qualified aggregates to avoid Issues for Ada 202x.

Check that Ada.Containers.Bounded_Vectors is preelaborated, and it and types declared in it can be used in
preelaborated packages.

[VCS Label A4_1U] Corrected instance prefix of No_Element in some Insert calls. Qualified aggregates to avoid issues for Ada 202x.

CXAIB03 [Pending New] VCS Label: A4_1U
Required after 2021-07-01
[VCS Label A4_1T] Check that Ada.Containers.Doubly_Linked_Lists is preelaborated, and it and types declared in it can be used in preelaborated packages.
[VCS Label A4_1U] Corrected instance prefix of No_Element in some Insert calls.

CXAIB04 [Pending New] VCS Label: A4_1U
Required after 2021-07-01
[VCS Label A4_1T] Check that Ada.Containers.Ordered_Maps is preelaborated, and it and types declared in it can be used in preelaborated packages.
[VCS Label A4_1U] Corrected instance prefix of No_Element in some Insert calls.

CXAIB05 [Pending New] VCS Label: A4_1T
Required after 2021-07-01
Check that Ada.Containers.Bounded_Doubly_Linked_Lists is preelaborated, and it and types declared in it can be used in preelaborated packages.

CXAIB06 [Pending New] VCS Label: A4_1T
Required after 2021-07-01
Check that Ada.Containers.Bounded_Ordered_Maps is preelaborated, and it and types declared in it can be used in preelaborated packages.

CXAIB07 [Pending New] VCS Label: A4_1T
Required after 2021-07-01
Check that Ada.Containers.Hashed_Maps is preelaborated, and it and types declared in it can be used in preelaborated packages.

CXAIB08 [Pending New] VCS Label: A4_1T
Required after 2021-07-01
Check that Ada.Containers.Bounded_Hashed_Maps is preelaborated, and it and types declared in it can be used in preelaborated packages.

CXB3019 [Allowed Modification] New VCS Label: A4_1S Org VCS Label: A4_1
Required after 2021-01-01
Added missing failures if Program_Error is not raised when expected.

CXB3020 [Allowed Modification] New VCS Label: A4_1S Org VCS Label: A4_1
Required after 2021-01-01
Added missing failures if Program_Error is not raised when expected.

CXB3021 [Allowed Modification] New VCS Label: A4_1S Org VCS Label: A4_1
Required after 2021-01-01
Added missing failures if Program_Error is not raised when expected.

CXB3022 [Allowed Modification] New VCS Label: A4_1S Org VCS Label: A4_1
Required after 2021-01-01
Added missing failures if Program_Error is not raised when expected.

CXB3023 [New] VCS Label: A4_1A
Check that a value of an unchecked union type (defined with pragma Unchecked_Union) can be passed to a C function.

CXB3024 [New] VCS Label: A4_1A
Check that a value of an unchecked union type (defined with aspect Unchecked_Union) can be passed to a C function.

===== Annex C =====

BXC6A03 [Modified] VCS Label: A4_1G
Changed subtest result to require the changes of AI05-0218-1.

===== Annex D =====

CXD2007 [Modified] VCS Label: A4_1C
Added missing N/A => Error tag.

LXD7001 [Modified] VCS Label: A4_1C
Added missing error tag.

LXD7003 [Modified] VCS Label: A4_1C
Added missing error tag.

LXD7004 [Modified] VCS Label: A4_1C
Added missing error tag.

LXD7005 [Modified] VCS Label: A4_1C
Added missing error tag.

LXD7006 [Modified] VCS Label: A4_1C
Added missing error tag.

LXD7007 [Modified] VCS Label: A4_1C
Added missing error tag.

LXD7008 [Modified] VCS Label: A4_1C
Added missing error tag.

LXD7009 [Modified] VCS Label: A4_1C
Added location indicators.

CXDB001 [Modified] VCS Label: A4_1C
Added missing N/A => Error tag.

CXDB002 [Modified] VCS Label: A4_1C
Added missing N/A => Error tag.
CXDB003 [Modified] VCS Label: A4_1C
   Added missing N/A => Error tag.

CXDB004 [Modified] VCS Label: A4_1C
   Added missing N/A => Error tag.

===== Annex E =====
[None.]

===== Annex F =====
[None.]

===== Annex G =====
[None.]

===== Annex H =====

LXH4001 [Modified] VCS Label: A4_1C
   Corrected format of error tag; added location indicators.

LXH4003 [Modified] VCS Label: A4_1C
   Corrected format of error tag; added location indicators.

LXH4006 [Modified] VCS Label: A4_1C
   Added missing error tags.

LXH4009 [Modified] VCS Label: A4_1C
   Added missing error tags.

LXH4013 [Modified] VCS Label: A4_1C
   Added missing error tags.

LXH4014 [Modified] VCS Label: A4_1C
   Added missing error tags.

===== Support =====

F350A00 [Pending New] New VCS Label: A4_1R
   Required after 2021-01-01
   A foundation for discrete specified Default_Value tests.

F350B00 [Pending New] New VCS Label: A4_1R
   Required after 2021-01-01
   A foundation for real specified Default_Value tests.

F360A00 [Pending New] New VCS Label: A4_1S
   Required after 2021-04-01
   A foundation for discrete specified Default_Component_Value tests.

F360B00 [Pending New] New VCS Label: A4_1S
   Required after 2021-04-01
   A foundation for real specified Default_Component_Value tests.

F611A00 [New] VCS Label: A4_1C
[VCS Label A4_1A] Foundation for tests C611A01, C611A02, and C611A03.
[VCS Label A4_1C] Added additional data for test C611A04. The changes are only needed for that test.

F611B00 [New] VCS Label: A4_1A
Foundation for tests C611B01, C611B02, and C611B03.

FDD2B00 [New] VCS Label: A4_1Q
A foundation for Stream_Size aspect tests.

FXAIB00 [Pending New] VCS Label: A4_1T
Required after 2021-07-01
A foundation for container preelaboration tests.

GRADE.A [Modified] VCS Label: A4_1G
[VCS Label A4_1C] Allowed manual grading for tests that are missing execution or linking (with no earlier errors). Corrected the result for binder crashes. Added category totals to the summary.
[VCS Label A4_1D] Corrected so that Annex C RQMT failures are properly counted in their own category.
[VCS Label A4_1G] Corrected call @1578 so that the special handling flag rather than the failed flag is used with a manual grading message for a missing error set. (The actual grade was correct, only the message was wrong.)

GRD_DATA.A [Modified] VCS Label: A4_1P
[VCS Label A4_1D] Increased table sizes as the new tests have caused grading the entire ACATS to exceed the old limits.
[VCS Label A4_1M] Generalized reading of white space in order to be more resilient, especially on Unix-like systems.
[VCS Label A4_1P] MAX_SUMMARY_ITEMS @66 was increased to 40_000 as the ACATS has grown to exceed the old limit.

SPECIAL.A [Modified] VCS Label: A4_1J
[VCS Label A4_1C] Added test BA21005 to the list of optional main subprograms.
[VCS Label A4_1H] Added seven tests to the list of optional main subprograms.
[VCS Label A4_1J] Added more tests to the list of optional main subprograms.

SUMMARY.A [Modified] VCS Label: A4_1C
Corrected identification of main subprograms in modern tests. Changed the unit name for subunits to be the full expanded name including the parent name.

TCTOUCH.ADA [Modified] VCS Label: A4_1H
Added code so that Touch only reports buffer overflow once. Fixed the Id string.
The official home of the ACATS test suite is the ACAA web site. The site can be accessed at www.ada-auth.org.

The complete set of official new and modified tests are available in the Mod_4_1U.Zip and Tar files on the ACAA web site. As always, when a multi-file test is modified, we provide all of the files, including the unmodified files.

Individual new and modified tests can be retrieved from the ACATS VCS. Simply navigate to the appropriate directory (folder), and select the test you want. Select the revision you want (usually the most recent) and it will be retrieved for you. Tests are stored in directories that correspond to the test’s prefix. For instance, the test CD92001.A will be found in the CD directory. You can also browse the differences between versions of a test. [In case of a conflict, the files in the ACATS VCS should be considered the 'official' versions.]

If you cannot get the files from the official site or you cannot get the files in a format appropriate for your processor, please contact your ACAL.

The baseline ACATS 4.1 is available in various formats on the ACAA web site.
